

AI Developer

You are

- Passionate about technology
- A nerd at the keyboard
- Driven by curiosity and enthusiasm
- Accountable and strong in implementation
- Entrepreneurial in spirit
- Someone to have a good time with

Your role

- Build and train ML models on image data
- Implement rule-based analysis algorithms to quantify image data
- Coding data analysis routines to evaluate tests
- Integrate ML models into software and industrial production environments
- Willingness to learn about industrial X-ray technology

Your profile

- Bachelor's degree in Computer Science, Engineering, Physics, Chemistry, Mathematics, or a related field
- Proven implementation track record in data science and ML
- Strong Python programming skills
- Several years of C++ experience preferred
- Working knowledge of Linux environments
- Knowledge of cloud environments, APIs, and databases
- Fluent in German and English

Who we are

- A deep-tech startup using ML to revolutionize industrial X-ray technology. Based in Vaduz, Liechtenstein
- Operating our own high-power X-ray equipment to acquire data and develop cutting-edge solutions
- Founded by experienced professionals with PhD-level expertise in Materials Science and Computer Science
- Transforming academic research into industrial applications
- Seeking highly motivated individuals driven to achieve ambitious goals in a collaborative environment
